

observationes de *Cataleptico* et *Aere lethali*; mit-
tam primâ occasione.

Nunc dissertatio à me edita est de *Tæniâ* *,
ubi ostendi rostrum et os, more Polypûm, esse
in singulo articulo. Sunt duæ distinctissimæ spe-
cies *Tæniæ* : altera osculis ad latus, altera in mar-
gine; quæ ad latus os habet, exserit ex osculo
proboscidem parùm rigidum, quo se adjuvat dùm
repat et movetur; et circà hoc rostrum, osculo
attract succum; sed ad apicem crassiorem nul-
lum habet caput, hoc verò in singulo articulo,
unà eum intestinis. Habeo plus quam 20 specie-
rum; 14 reperi in uno subjecto viv.

Mittam dissertationem, dùm licet.

Nuper intellexi 18 dissertationes meas, priùs

* *Tænia*. Amæn. Acad., vol. II, 1748.
